	fellow-convicts who worked on a new airfield in Kladno (N 51/L 59) in March 1951 that a new military airfield was under construction east of Dobra (N 51/L 58), on the western edge of Mozova Hora (N 51/L 58). Work had allegedly started at the end of 1949. Laborers graded the area and constructed runways. Large concrete shafts in which aircraft were to be parked were dug into Mozova Hora Mountain. The field was to be completed by the end of 1953 under the Five Year Plan. More than 2,000 laborers worked 10 hours daily at the field. More than half of the workers were convicts, who said that large quantities of sand, cement, and gravel arrived at the field and that large areas were being concreted. According to civilian laborers, the airfield will be occupied by jot aircraft assigned to the defense of Prague. *
